OBJECTIVE

As a Computer Science and Engineering student with a keen interest in web development, I am looking for an opportunity to grow in a professional environment where I can apply my practical skills, learn from real-world challenges, and steadily improve. I am committed to continuous learning and contributing to team goals with dedication and a positive attitude.

EDUCATION

Bachelor of Engineering (B.E), Computer Science and Engineering Anna University

Velammal Engineering College, Chennai, India

2022–2026

CGPA: 6.85/10.0

Higher Secondary (Class 12)

Kendriya Vidyalaya, Ashok Nagar, Chennai, India
CBSE

2022

Percentage: 63.5%

Secondary School (Class 10)

Kendriya Vidyalaya, Gill Nagar, Chennai, India
CBSE

2020

Percentage: 69%

PROJECTS

AI-Based Network Traffic Detection System

- **Problem Statement:** Identify and analyze malicious network traffic to improve network security and intrusion detection.
- **Tools Used:** React, NIDS, Network Traffic Analysis
- **Solution:** Detection results are sent to a React-based interactive dashboard that visualizes attack types, traffic behavior, and alerts.

🔗 AI Traffic Detection

Code Vulnerability Detection and Exploitation

- **Problem Statement:** Identify and analyze common web application vulnerabilities such as SQL Injection, Cross-Site Scripting (XSS), and Code Injection.
- **Tools Used:** JavaScript, Python, PHP, React, Nodejs
- **Solution:** Developed vulnerable and secure code examples demonstrating how attacks are performed and prevented, helping improve secure coding practices and application security awareness.

🔗 Code Vulnerability

EMS – Employment Management System

- **Problem Statement:** Build a web-based platform to manage employees, tasks, and admin operations.
- **Tools Used:** React, Vite
- **Solution:** Developed a system with secure login, employee dashboards, task assignment features, and admin controls using React and Vite.

🔗 EMS

INTERNSHIP

Web developer Intern

Wheels India Pvt Ltd

Chennai, India
12 Jan 2026 – 12 Apr 2026

- Gained hands-on experience in SAP modules and enterprise resource planning (ERP) systems.
- Assisted in data management, business process integration, and system configuration tasks.
- Analyzed workflow processes and contributed to improving operational efficiency.
- Collaborated with team members to understand real-time industrial applications of SAP.

Frontend Web Developer

Prodigy Infotech (Remote)

Chennai, India
01 Dec 2024 – 31 Dec 2024

- Developed interactive weather-based landing pages, achieving success in API integration in real-time weather display.
- Implemented HTML, CSS, JavaScript, and OpenWeather API, enhancing user engagement and UI responsiveness by 50%.
- Conducted testing on API response data, identifying latency issues and improving load times.

TECHNOLOGIES

Languages: C++, C, Java, SQL, React, Vite, MongoDB, Next.js

Tools .VSCode, Github, Figma, Adobe premiere pro, Final cut pro.

CERTIFICATIONS

- Foundations of Cyber Security, Google- (August 2024)
- MongoDB University Course: Database Management Indexing (July 2024)
- In-Plant Training in Software Testing, Arjun Vision Technology (June 2024)
- Complete Java Course, Great Learning (May 2024)
- Front End Development – HTML, Great Learning (January 2024)

HACKATHONS

- Attended **Hackathon 1.0** at Velammal Engineering College.

INVOLVEMENT

- Domain Coordinator – CodeSprint Hackathon, Ozmenta '25, Velammal Engineering College.
- Participated in **Memoria Maze** symposium at RMK Engineering College.
- Participated in **Ohm's Odyssey** symposium at RMK Engineering College.
- Participated in **ILIZIAM'S 25** symposium at VEL TECH.
